

2019 AS SEEN FROM THE PERSPECTIVE OF THE TETRAKTYS

The Tetraktys is an ancient symbol which can be interpreted in many ways, and can be applied as a visual representation of the journey for the number 1. This can be used to illustrate how powerful 2019 may be, as we come to the end of karmic years.

On a planetary level we are witnessing everything coming up to be transformed, and it is perhaps no co-incidence that 19 in terms of Numerology represents the correct use of power.

On one level these are scary times, but we are also privileged to witness shifts that will potentially impact everyone. Such shifts only occur once every one thousand years.

The zero in Numerology represents potential, and the 3 zeros in the year 2000 can be seen to represent a great potential for creativity. By the time the planet had reached the year 2000, we had experienced more than 1900 years with the number 1 at the front of the year. This means that for most of that time everyone on the planet had a 1 in their numerology chart. The 1 is a masculine fire type of energy, an unstoppable generator that can be very naïve and focussed on survival as an independent, self- achieving pioneer.

We now have a 2 at the front of the year and in approximately 100 years everyone on this planet will have this 2 in their numerology chart. By contrast the 2 is a feminine energy, dominated by the water element and the moon. The 2 energy represents the diplomat, the facilitator and the co-ordinator whilst preferring to work in more subtle ways, behind the scenes as a peace maker.

In the last one thousand years we have become very accustomed to the dominant 1 energy. In the next one thousand years we will be able to fully integrate the new 2 energy. In the long term we may need a new education system as students could become less competitive. In time we may also witness a new type of leader emerge, a leader who works in more subtle ways with great compassion and fully utilises 'soft power'.

Initially this adjustment may cause great confusion and conflict as many will want to continue to benefit from how things have always been, and may feel threatened by such profound changes. However, those in power must soon come to recognise that in order to stay in power they will have to adjust to a new type of customer and/or voter emerging, as new technology encourages like-minded people to get into groups more easily and allows everyone's voice to be heard.

The Tetraktys illustrates how, for the first 10 years (2000 to 2010) we are 'learner drivers' in new territory and learning to work in new ways with this new 'soft power' (the numbers 1 to 10 influence the 2 at the front of the year in different ways). The 5 at the centre represents the mind and can be seen here to touch each of the numbers, the mind thinking in new ways at each stage of the journey.

At the top of the Tetraktys we have the trinity or blue print of the divine intent (1 masculine, 2 feminine, working together with potential for the creativity of the 3 to breakthrough).

We can see from 11 to 14 the movement is in a whole new direction, for the first time we can reflect on how we choose to apply this new energy as we no longer regard ourselves as 'learner drivers'.

16/ 7 here represents the reflection of the mind in action, the 16th Tarot card is The Tower. This card represents the tower coming down in order that we can focus on finding the treasure within (the 17th card represents 'The Stars').

18, 19 and 20 on the Tetraktys can be seen as the trinity reflected back. This can represent an opportunity for us to reflect on how we have used this pure energy, with amazing potential radiating from the original Trinity or blue print.

The year 2018 ($2+0+1+8 = 11/ 2$) gave us the potential to be open to new ways of thinking, if we can just get past our fear of failure and rejection.

The 18th Tarot card is 'The Moon', here there can be shadows and the potential to recycle everything, as the 9 goes back over every experience to extract the wisdom. (The 18th letter R is used in words such as return, revise, repeal, revisit etc). With 18/ 9 energy you can be holding on too tightly to a structure that has already gone, and ultimately you have to let go so that new energies can come through. This can mean a massive re-evaluation (8), as everything comes up from the shadows or the unconscious to be looked at and ultimately recycled, as light goes into the dark.

The year 2019 ($2+0+1+9 = 12/3$) can be seen to represent the trinity, this may give us the potential for love/wisdom (2) to influence our will (1) and for great creativity and co-operative ventures to result, as masculine (1) and feminine (2) energies work together to create(3).

The 12th Tarot card is 'The Hanged Man' with the image of a man hanging upside suspended down by a golden thread. Coins are falling out of his pockets, but he's at peace and has great poise as he sees everything from a completely different perspective.

The 19th Tarot card is 'The Sun' which illuminates everything, allowing for no shadows.

19/ 10/ 1 represents the correct use of power, and in this situation demonstrates our potential to go back to look at our original plan and reflect on the pure energy of the original blue print (or Trinity). The great wisdom of the 9 is potentially influencing the will (1) to encourage 'new age type leaders' to emerge, who will be focussed on helping humanity (9) rather than just focussed on themselves (1). We are now also in the Age of Aquarius which encourages brotherhood of man.

Whilst world peace is a common goal and everyone is agreed that we can't carry on as we are, unfortunately most of us choose to stay in our comfort zones. Moving forward this may not be an option as change is guaranteed.

Humans have caused the problems and only humans can solve the problems with radical new thinking - as Albert Einstein once said "In the middle of difficulty lies opportunity".

Let's hope that new thinking and truly co-operative ventures prevail, allowing the light of 'The Sun' to come through and our planet to survive ...
